DETAILED ACTION

1. Claims 1-2, 5-24 and 26-36 are pending in this application.

Election/Restriction

2. Applicant's election with traverse of Group I, Claims 1-2 and 5-13 in a paper filed on 9/29/2005 is acknowledged. The traversal is on the ground(s) that the "Inventions I and IV in the present application would not created a serious burden for the patent Office. More specifically, Invention IV is drawn to a library of compounds that comprises at least one compound according to claim 1". The examiner disagrees with applicant's argument. Group IV is drawn to library of compounds and is different from Group I that is drawn to pyrazino[2,1-c][1,2,4]triazine derivative compounds. Note that Group IV (claims 14-15) requires at least one compound according to claim 1 and contains another unknown compounds. One skilled in the art would not consider the invention of Group I to be equivalent to that of Group IV. Furthermore coexamination of the additional group would require search of subclasses unnecessary for the examination of the elected claims. For example, the search for the invention of Group IV would include search of subclass 435/4. Therefore, coexamination of the additional invention would require a serious additional burden of search.

The requirement is still deemed proper and is therefore made FINAL.

3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected

Art Unit: 1624

invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action. Note that $G = N$, since the elected invention is drawn pyrazino[2,1-c][1,2,4]triazines compounds. Thus, applicants have to define $X = N$ and not nitrogen and CH and delete the proviso. See claim 6.

Information Disclosure Statement

4. Applicant's Information Disclosure Statement, filed on 10/08/2004 has been acknowledged. Please refer to Applicant's copies of the 1449 submitted herewith.

Claim Objections

5. Claims 1 and 5-6 are objected to because of the following informalities: the recitation of "general formula" is not specific. A formula should be specific and not "general". It is recommended that applicants delete the term "general" to overcome this objection.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 and 5-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

Art Unit: 1624

a. Claim 1 and claims dependent thereon are rejected because the phrase "amino acid chain moiety, an amino acid side chain derivative, a linker, and a solid support" is indefinite. What is covered by said phrase and what is not? What linker? What solid support? Applicants have to recite "amino acid chain moiety", "amino acid side chain derivative", "linker" and "a solid support" to overcome this rejection.

b. In claim 5, the phrase "G is (XR7)_n" lacks antecedent basis because there is no definition for integer "n" in claims 1 and 5. Since G is N for the elected invention of Group I, it is required that applicants delete "n" from claims 1 and 5. Note that the definitions of integer "n" have been deleted both in claims 1 and 5, but the variable G contains the integer "n" in claims 1 and 5.

c. Claim 11 is rejected because it depends from a cancelled claim 3.

d. Claim 13 is rejected because the claim limitation "a safe and effective amount of the compound" fails to narrow down the limitations of claim 12 from which it depends. As far as we know, the composition in claim 12 is safe and effective. It is recommended that applicants delete claim 13.
